Boelube 70201	Pink Solid
Boelube 70206	White Solid
Boelube 70302	Blue Soft Paste
Boelube 70305	Pink Hard Paste
Boelube 70307	Blue Medium Paste

ABOUT BOELUBE PRODUCTS ■■■

- Manufactured from personal care ingredients, BOELUBE is dermal non-irritant and biodegradable.
- BOELUBE is non-corrosive, contains no water, halogens, sulfur, phosphorus, silicone, petroleum or paraffin wax.
- BOELUBE provides superior lubrication when machining or forming the increasingly complex range of materials now being used in Aerospace and other manufacturing industries.

Products approved by Airbus to the requirements of A2MS 569-001. Purchase this product under its commercial name only.

Specification	Description
Class A	Lubricants / Coolants intended for boring, turning, milling and grinding operations and for non assembly drilling, reaming and countersinking.
Class B	Cancelled. Refer to Class A.
Class C	Lubricants/Coolants intended for assembly drilling, reaming and countersinking in areas not to be subsequently sealed or primed/painted.
Class D	Same as Class C except in areas to be subsequently sealed or primed / painted.
Class E	Cancelled. Refer to Class A.

Classes B and E are replaced by Class A only.
